Anything is Pawsible

I believe in love, Alfie.

Without true love we just exist, Alfie.

When you walk, let your heart lead the way.

And you'll find love any day, Alfie.

That's how we feel about our special little guy Alfie. Alfie came to us through a volunteer. She knew a couple that could not care for him in his fragile state. Both of Alfie's eyes were cloudy and his vision was very limited, and he would continually spin in circles. The volunteer knew Paws Place could help, and we did. The volunteer took him to her vet and got vaccinations and several eye medicines. Paws Place was able to get him an appointment with the Animal Eye Doctor. Our vet wasn't sure why he constantly made circles. Besides his eyes, there was nothing that would prevent him from being adopted. We told Alfie's story on Facebook and asked for appointments given we knew he would be so popular. After a long, hard search, we found the perfect home for him. Alfie's vision is much better and he only spins when he gets excited.

There is only one happiness in this life...

to love and be loved. Love you Alfie

Size: 60 lbs

HW: Positive - Completed Treatment

Who can resist a young lab mix? My name is Ridley and my favorite pastime is snuggles. Ridley came to Paws Place through a county shelter. He was diagnosed with lumbar/sacral fractures that were not new and could not be repaired. He is a very happy boy and can do anything a non-injured dog can do. He was heartworm positive when he arrived and he has successfully finished his heartworm treatment. He is partially incontinent and would probably need to wear a diaper if he is adopted. Ridley has a lot of love to give and wants to have his own family. Ridley keeps watching the gates waiting for his forever family to come, but every day his heart breaks a little more. Do you know where they are? Can you help Ridley find his forever home?
